Harvesting in Full Swing

The last crop of 1920 is fast falling to the binder, and if the weather holds three-fourths of it will be cut by the end of the present month. Everything is practically ripe, and the frost damage is passed as far as the grain is concerned.

Some farmers are now practically finished cutting their grain, while others just started in at the beginning of this week, but every available binder is now fully employed, and every man who wants a job is working twenty hours a day as daylight will allow.

Apart from possible diminution of the yield by bad weather of a tenth or more, the crop is well along to maturity, their having been very little damage from either hail, rain, insects, or gophers except on isolated places, and the total yield for the district is going to be high while the grain which is harvested will be very good indeed.

Wheat openedat Winnipeg last week at \$2.75 for delivery, and some farmers are getting \$2.75 for their wheat at that figure. There is an element of uncertainty in the price of this year's crop, as open trading has been dead since 1917, but with shortage of wheat in the market, and the fact that there is no reason why the prices should not remain high, and the price as good as obtained for last year's crop.

There has been no rain since last week and irrigation is being engaged in for garden seed, alfalfa, etc., and it is probable that a lot of fall irrigation will be done in fields where the stocks have been removed in time and around plowed for next year's crops.

Duck Shooting

The duck shooting opens next Wednesday morning at 8 o'clock, and all stations are silent, and the guns and ammunition shape bows are reported to be plentiful this year in the streams in the district.

We went to the Community Theatre the other evening to see Charlie Chaplin slipping on a banana皮and we were forced to admit that we enjoyed the antics of the mighty animal little end. At the end of the show, Charlie had not one more. Two million dollars per annum is more than any man can earn by doing nothing and awaiting people with a skeptical smile; and more than we are likely to find in the world. He is the only man who can make his truly marvelous kind of philosophical research. Charlie can't use all that money, even with boulders at his feet, and with our present political situation, he can't take the sarcasms with him to the next world. Even so, Charlie gives immensely better value for his money than a dozen of people who gather a great deal of dust.

He has a great deal of a whole life, and he is said of a pragmatical preacher, and a politician and a writer, and a newspaper editor. It is more than we can say for the politicians who take toll of our food, clothing, fuel, etc., more than we can say of the idle society top and dandies, the shyster lawyers, the fertility-baiting politicians, the socialists, the economic aristocrats, and the professional militarists as a class. Too long has the world been carrying a useless burden of bachelors; it is time they were scraped off.—Battling Press.

Hospital Board to Meet Successful Farmer and Thought He Was To An International Scrap Be Hanged

Project Almost Ready for Submission to People

Mr. A. C. McKey, hospital organizer for the Province, was in Strathmore on Saturday, and visited the offices of the town and M.D.'s Bow Valley.

He stated that the boundaries of the proposed hospital district, under the name of Bow Valley, would now practically coincide with the exception of a small section near Okotoks, in the Sheep Creek district, which would on September 2nd take a plebiscite as to whether or not it would be annexed to the new district.

Immediately the decision of this plebiscite has been recorded, a meeting of the provincial board, consisting of two representatives from each county, and the members will be held in Calgary when a scheme will be formulated for subdivision to the districts.

If the proposed scheme is approved by two-thirds of the ratepayers voting, it will come into effect.

Therefore the Hospital assessment will be levied on every taxpayer in the district, and hospital treatment will be given at a nominal sum to ratepayers from each county, and emergency cases.

Mr. McKey is representative from Bow Valley Municipality is Mr. Amos Watson, last year's Reeve, and for the Town of Strathmore, Mr. W. R. Brown of whom has taken an active part in the hospital movement.

It has been suggested that the representatives of the Municipalities and towns lying to the east of Calgary and included in the scheme should get together previous to the general meeting of the ratepayers to discuss their own particular problems.

There will have to be a considerable amount of give and take on all sides in connection with the hospital project, and it would be a good idea to represent the various districts in the area to the east of the city could get together and settle the minor points first.

The probabilities are that in addition to the main hospital at Calgary, subdivisions will be established at Lethbridge, Strathmore, and several other points within a sixty mile radius of Calgary.

Inquiries have already been made to the doctors in the area, and arrangements will be made by the men of the C.P.R. who own most of the vacant lands in the townships.

The working of the hospital project in Strathmore will depend on the coming of patients fees, will be liable to the Board in arriving at the cost of maintaining a cottage hospital in a country district, and the large number of patients that have been handled by the hospital.

The project, however, shows the value of an institution of the kind.

The project will probably be voted on sometime during the coming winter, and the scheme therefore could come into operation during next summer.

Prohibition Vote Oct. 25

An official notice is now given that the vote on the continuation or non-extension of the禁酒令into the Province will be taken on the 25th of October of this year.

Premier Steeves has stated that if

it is a majority in favor of non-

extension he will interpret it as

meaning that a bona fide province is wanted by the majority, and will pass legislation accordingly.

The vote will be held on election day, and the public will not have an opportunity to express any preference except on the main issue.

The vote will be taken by ballot.

Political districts, and for the

electoral division of East Calgary, Mr.

L. W. McArdle, barrister, is the chief returning officer.

His 1920 Crop

—o—

For several years past we have had occasion to draw attention to the big crops harvested year after year by Mr. J. C. Cammert, seven miles west of Strathmore.

Mr. Cammert usually makes use of irrigation largely for his grain crops as well as his alfalfa, etc., and last year carried off third prize in the Alberta Provincial Fair for his second best crop of ten acres at a man jumping out of a carriage window, and ran off up town as hard as he could. Stopping in front of a car driven by Mr. G. E. Bell, Mr. Bell asked him in exasperation to take him to the Police Station, as "they" were after him.

Mr. Bell took him in the car and drove him to the Alberta Provincial Police Post, but Constable Pollock, who was on duty, told him that he had been assaulted by Williams, while stopping in front of a car driven by Mr. G. E. Bell, Mr. Bell asked him in exasperation to take him to the Police Station, as "they" were after him.

This year Mr. Cammert did not irrigate his land, and had to depend upon rain and sun, and his crop, which he started cutting on Saturday, shows every promise of again being a record crop.

Mr. Cammert has a large acre

area in field peas and alfalfa,

which looks as if it will almost touch the hundred bushels per acre mark.

He who believes will average forty bushels per acre, and his eight-acre plot is planted to Kitchener wheat, the seed being from the plot which gave him the sixty-six bushel yield on the record plot last year.

Mr. Cammert also has a considerable area in field peas and alfalfa,

which is looking first-class.

On an oil field planted with Leader oats, on which was planted with Leader oats, on which was planted with an exceptionally high yield due to the recuperative effects of the alfalfa on the soil.

There has been some difference of opinion as to what effect the extremely hot weather in August had on his crop. Mr. Cammert believes that it might cause damage and that it might amount to 25 and 25 per cent on many fields.

However, Mr. Cammert's crops and the other crops grown in the district, in every case where the opportunity has been given to get the land in good shape, and the seedling properly done, are looking splendid, and the yields will be heavy.

Last week Mr. Cammert purchased and sowed three bushels each of three good varieties of oats. Last fall three bushels Leader Oats, his 13 bushel yield of 88 bushels per acre. From three bushels of Leader Oats he got 11 bushels, or 88 bushels per acre, dedicated to Ontario Agriculture College he got 11 bushels, or 88 bushels per acre, and from three bushels Victoria Oats he got 9 bushels averaging 9 bushels per acre.

The yield of Mr. Cammert's oats is 60 acres in Leader Oats and 88 in Kitchener Wheat. He has a total of 250 acres in crop.

Planting Alfalfa

This year Mr. Cammert is seeding fifty acres in alfalfa and figures on sowing a similar amount, even year, so that it will work in on a crop rotation and preserve the fertility of the soil.

Alfalfa will obviate the necessity of summerfallow, and as alfalfa puts nitrogen in the soil, it will mean larger crops than could be obtained by other

The School Fair

—o—

The second annual Strathmore School Fair will this year be held on Saturday, Sept. 13, and a great deal of interest is to be manifested both among children and adults.

It is intended to use the school buildings and grounds for the Fair, and it is also planned to secure the use of a hall for the school program.

The full price list was published in the Standard some weeks ago, and copies have been sent out for distribution to the schools.

While the fair will be run in connection with the Fair and generally the same hours will be run as the Fair, the days promised to be a big one, and exhibits should be exceptionally good.

English Girls For Canada

—o—

Wednesday a rather peculiar case was heard before Justices Laufer and Vickery, when a Chinese cook's complaint of assault, against H. Adams, restaurant keeper, was heard.

Evidence on both sides was heard, the Chinaman's plea being that he had been assaulted by Williams, while the other was Williams' friend, Mr. Bell, who had been sent to take him over to the Prince's Station, as "they" were after him.

Mr. Bell took him in the car and drove him to the Alberta Provincial Police Post, but Constable Pollock, who was on duty, told him that he had been assaulted by Williams, while stopping in front of a car driven by Mr. G. E. Bell, Mr. Bell asked him in exasperation to take him to the Police Station, as "they" were after him.

The Magistrate finally dismissed the case, with costs against the Chinaman.

Our correspondence is suffering these days, probably on account of the harvest and everybody being busy. Don't forget though, that if you want to keep your district on the map you should have the news from it printed in the Standard from time to time.

—o—

Mr. Wallace Gibson left last week for Seattle, Wash. and other points in the Western States.

—o—

Mr. and Mrs. Goo Ropell have returned to their farm home.

A generation ago there were 250,000 superfluous women in England and Wales; to-day, in the same countries, there are two million marriageable girls for whom there can be no husbands.

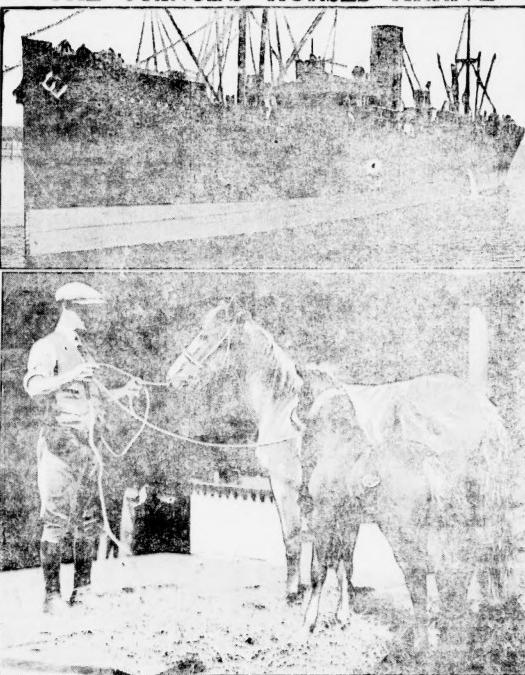

The war, of course, is largely responsible for this situation with the flower of England's manhood cut off in its prime, the demands of potential mothers and fathers increased in the cause of humanity. A survey of conditions suggests only one solution to this great superfluous mass of women, and this lies in immigration to more congested areas and countries where the sexes are more evenly divided.

Eye Look Favorably Canadawards

There is every indication that the eyes of the women of England are turning to Canada and with a boundless enthusiasm. Our country can be hardly struck with the pronounced female element in passengers on liners arriving at Dominion ports. For a long time these were war brides returning with their husbands, and now we are seeing young men who preceded them across the Atlantic, but since the beginning of last winter a complete change has come over the face of recruitment, and the number of English girls is increasing.

Hundreds of parties of 100 domestics bound for Western Canada; of 150 canoes and transport army girls for various occupations in the Dominion; (Continued on back page)

Any man can take a newspaper. It is the cheapest thing he can buy. Every time a hen chicks and lays an egg his paper is paid for that week. It costs less than a postage stamp—less than to send or receive a letter. If it comes to you every week, rain or shine, calm or storm. No matter what happens, it carries your dear a welcome friend, full of sunshine, cheer and interest. It opens the door of the great world and puts you face to face with people and its great events. No man is just to his children or kindred who does not take his home paper.

Local Jottings

- * * * OF LOCAL INTEREST *
- * Readers are requested to send items for this column not later than 12 o'clock Monday noon preceding day of publication. All local news items are welcomed by the Standard. Phone 17 or 28.

Mr. Joe Van Thiel has left on a two weeks' visit to Victoria, B.C. While Mr. Van Thiel and family are at present in Victoria, the Standard will publish news from them.

Sept. 1st is the last day for the discount on Town Taxes. Go upstairs and save 5 per cent.

As will be seen from our advertising columns Mr. A. Layzell is holding a sale of various seed horses in Strathmore on Saturday of this week, Aug. 29th.

A set of traps will be early next Wednesday morning when we are up late early doors. The ducks will have a tough time.

"Might back there," said the conductor from the front of the car. "Hold on," came a female voice. "Wait till I get my coat on." The man turned around and checked their seats especially. A girl sat on with a basket of laundry.

A rookie who was the last of all jobs was on guard one night when he heard a noise outside. It was dark. "Who goes there?" he challenged. "Major Mousie," replied the officer. The rookie started a new joke. "Glad to meet you, Major, old fogie," he sang out. Advance and away the two continued.

Mr. C. W. Chase has left for the rear on a 10 day tour to the Rockies. He will be back in time for the opening of the fall business.

Mr. R. Fox, of Moose Beach and Pon, left for Winnipeg, where he will meet his relatives who are coming out from Carlton.

Strathmore Masonic Lodge met on Monday evening of this week, when regular candidates were put through.

Strathmore IOC will meet again on Tuesday evening. Their half brother, W. E. Brown's store, commencing the first Thursday in September.

The storekeepers weekly half-holiday meeting was held on Saturday, the anniversary of the birth of Alberta. It was not intended that the half-holiday arrangements should run into harvest time, but owing to the early start of harvest this year some of stores had to open last Wednesday afternoon.

Songs of our local people are being played in staff at present. Mr. E. Dobson has just completed a week's holiday there, with his family, and Mr. and Mrs. Marshall and family went up there on Sunday.

Mr. E. Zerkle left hurriedly for Chicago last week, having received information that his father was seriously ill. Mr. Zerkle has been a resident in the neighbourhood, living down here for a considerable time and we hope to hear of his recovery soon.

An enjoyable dinner and dance was held in Strathmore Schoolhouse on Friday night. The committee put a fund for school improvements and said that the school can be used as a centre for community meetings. An enjoyable evening was spent. There was a big crowd present, and the sum of \$75.00 was realized. Mr. W. Morris has recently been in touch with a phone and has the hearty thanks of pupils, parents, and teacher for his generosity.

The King Edward Grill has been taken over by Messrs. Miller and Gillis, two experienced restaurateurs from Calgary. Mr. D. Williams sold out to the Miller's and is taking a holiday for the present and looking out for another opening. We are sorry to see Mr. Williams go, as he has been a long time around the town and has given good satisfaction. The new owners of the King Edward Grill are going to run a first-class restaurant.

School opens again after the vacation on September 1st. We understand the full quota of teachers has now been secured, with Mr. L. T. Williams as principal, Mr. Craig, Vice-Principal and three half-teachers.

The school bell will now be heard again, it having been ringing outside of the buildings. In its former position on the tower it was difficult to get it to ring and was for a long time out of use.

**Saving Money
With Electricity**How One Hotel Keeper Reduced a
Big Item of Expense

With the increased interest in farming and farm living from the efficiency standpoint, there is a great tendency on the part of farmers to turn to electric power. And the investment will pay. Unquestionably most of the modern improvements offered to the farm home do pay in increased comfort of living and hence in increased and more productive work. And the return on one's investment will pay off. But it is also interesting to note that some of the modern improvements do pay directly through the dollars and cents savings they bring.

Take for instance of the matter of the electric vacuum sweeper. A certain hotel keeper in the middle of the western states found that the carpet in the hotel reception room, which was used by the manager and his wife, and occasional guests, had to be renewed every three years. He installed vacuum sweepers and found that his next carpet lasted for seven years instead of three. This means a saving of over \$100 in carpet merely the surface dirt and that the dust and fine grit left in the web of the carpet and beneath it, and ground it by people walking on it, and getting the dirt out of the carpet again. When vacuum sweeping was installed, the shaking effect of the sweeper brushes and the suction of the fan drew all of this dirt and grit out, and left the carpet to remain clean and free from dirt and walking. The hotel keeper found that this saving through making his carpet last twice as long more than paid for the vacuum cleaning system.

And the same thing will apply in the farm home. She who knows that a large amount of sand and dirt is brought into her house daily and that any system which will help her to keep her carpets free of dirt will be well rewarded. Consequently, the electric vacuum sweeper is at her service today through the development of the small electric light and power plants in farms. She's enjoying to the full the comfort and convenience of electric light, and in electric power she's finding a servant to do the washing, ironing, separating, churning and pumping, as well as the sweeping.

Large Profits In Sheep

Among the interesting and instructive exhibits arrived at the provincial fair by the University of Saskatchewan is a new one with which many may be likely to be interested. There is nothing about this veteran mode of lands to attract the uninitiated ex-

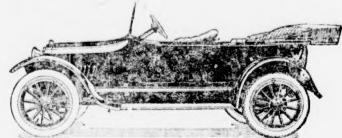

The Product of Experience

Made in Canada

THE more a man knows about automobiles, the more experience he himself has had with them the more critical he is apt to be on their essential features.

To satisfy this class of motorists is the chief motive of Chevrolet construction and equipment.

It is to this element therefore that the convenience of operation, accessibility and equipment, the dependability and economy of the Chevrolet makes its greatest appeal.

As a matter of fact she is rather simple, and just now, extremely unpopular, but she is a good girl. She has been travelling about on the Better Farming Train and attending exhibitions at Saskatoon and Regina, and has not been able to get married this year because she has been tied up to the proverbial masthead of the "animal with the golden head." Seven years ago she was purchased for \$475 and has kept in these years from annual expenses to the tune of \$162.50. She has given her owner during this same period a gross return in lambs and wool of \$255.50, and a net return of \$192.25.

She is a good girl, and educational or social, it is to show that the character of the ewe is of practically little importance compared with that of the ram; this ewe has been mated with pure bred rams of several breeds, and her lambs have been of high quality. The ram is part of the campaign being carried on by the livestock branch of the provincial department of Agriculture and the Provincial Department of the University of Saskatchewan to induce the stockmen of the province to give greater heed to the quality of the sires which they employ.

HALF A MILLION ACRES BEING RECLAIMED

Forty reclamation projects involving 500,000 acres of land and 100,000 people in Alberta, Saskatchewan, and Manitoba, and surveys are being conducted to determine the cost and means of bringing water covered areas into agriculturally useful surfaces. Seven of the 100,000 people live in certain towns in the Lesser Slave Lake district, in Northern Alberta. The scheme will also encourage hundreded acres east of Prince Albert, Saskatchewan, and a 100-mile tract between the Cypress and Saskatchewan Rivers, will be surveyed this summer.

Hay Crop Moving

Money from the 1929 harvest is already beginning to come in the irrigated areas of Southern Alberta. Hay is in great demand, and the tone, and are selling their new crop. The first two cars of 1929 have been loaded on last week, one from Lethbridge and one from Coalville, and will be made ready fairly soon now and a fairly good demand is expected.

Timothy harvest is just beginning to go underway. The first alalfa has been harvested and the second growth is being made for the third crop. The weather has been ideal.

Opening gates for the new hay crop are considered satisfactory. The prices quoted are:

No. 1 alfalfa, \$28 per ton.

No. 1 mixed timothy and alfalfa, \$31 per ton.

No. 1 timothy, \$34 per ton.

No. 1 ground alfalfa, sacked, \$45 per ton.

Strathmore, Alberta, August 25th 1929.

The Grain Situation for 1929

Now that the wheat crop has been harvested, we can begin to make an estimate of what the situation will be in one or two weeks time, the prices which we can expect to receive for it becoming an urgent question. What

the grain companies opened well last week at \$2.72, and that would be a satisfactory

price if it could be held throughout the season. But there's the rub. The

farmers themselves apparently do not

know where they are at, and are very

cautious in making quotations. This

is hardly to be wondered at, since even

trading has been suspended almost

1917.

What every farmer wants to avoid is a repetition of the pre-war system, whereby wheat was a good price at

the opening of the season, when there

was no wheat available for shipment, a

poor price when the bulk of the wheat

was being shipped, and a good price

again the following spring, when the

wheat was mostly all sold.

The continuance of the West Board, which functioned successfully last

year, and guaranteed each farmer a minimum price, and a surplus on ex-

portation which already amounts to one

per cent, and which will not in the

final result be less than one per cent

more.

Nearly everyone was sorry to hear

the announcement made that the Wheat Board was to be discontinued. Apparently it was a successful experiment. It has not cost the taxpayers anything so far as we know, and it stabilized prices in spite of a big embargo which continued to the end of 1919. If open trading with the U.S. is the boom it has been claimed to be, prices should be higher this year than last.

We believe a more vigorous protest

by the farmers would have resulted in the continuance of the Wheat Board.

It was not approved at the time it was put into operation, owing principally to the mention made at the opening of the season of '28 as a minimum price, but the inclusion of various

prominent officials of farmers organizations, such as Mr. H. W. Woods, President of the U.P.A. increased the confidence felt in its integrity. The

passing of the 30c surplus satisfied

practically everybody, so that the an-

nouncement made that it would not

be continued did not receive

as much interest or satisfaction by farmers concerned as unorganized.

There have been few, if any, prominent

officials of farmers' organizations in this country, as to the wisdom of continuing the Wheat Board as a permanent organization but all of them felt in view of difficulties in ad-

justing commercial international ar-

rangements, that one body to handle

whole wheat crop of Canada would

be most advisable for this year. The

countries that need wheat the most

have no money to pay for it, that is,

their money has very little value over

here owing to the exchange situation.

These countries will be slight financial

ly in time, but they need credit.

The question is, who is going to sup-

ply the credit. If the Canadian

farmer is going to get cash for his

wheat, someone has to put up the

money.

Great Britain to-day is loaning mon-

ey to Germany and other lately enemy

countries in order to enable them to

buy British products and set them on

the Roumanian or Greek, and col-
lect his money from the Canadian, who

is furnishing the credit for these peo-
ple to buy Canadian goods, they might

hand out a little to subsidize the
building of homes for Canadian people.

That everyone should own his own

home is an axiom that has been laid

down by wise men of the past, but

very few are able to build and own a

home of their own at the present

time of building material.

Presently the slogan, so popular in

the last few years, is "Own your home

and live like a King."

The Government has centralized

timber as they have wheat, given the

homemakers a sufficient price that

would cover his expenses and leave

a reasonable profit, and then sold

the timber at a fixed price, the re-

turn which would allow the ordinary

people a chance to build homes of

their own, they would have done a

great service for Canada.

Canada probably is in mind that

any other country in comparison

to her population. Why therefore

should there be such a large gap

between houses?

Those who have come to Canada

from other countries, particularly Europe, know that the landlord system

has been responsible for many mis-
eries, extortions, and immorality than

anything else. There is a strong

desire among the farmers to have

landlords. These are the many reasons

why the Canadian government

is trying to do away with the

landlord system. Every effort is

being made to do away with the

landlord system in Canada.

Government should step in and help

in this matter, especially in the case of

returning soldiers, men who have

bought for years in their country's

services, and who in many cases now

have little or no money, and if

possibly if an overseas home, then

difficult if not impossible, to get

one in Canada.

It is recommended that the

Government should do whatever

is necessary to do to help the

homemakers to have a home of their

own.

It is recommended that the

Government should do whatever

is necessary to do to help the

homemakers to have a home of their

own.

The Maytag Company Limited
Winnipeg, Manitoba, Canada

Last week, in this paper, we used about a foot of space to tell something about the

**Maytag
Multi-Motor
Washer**

This is but a reminder. If you are the ad, in last week's paper all well and good, and if you overlooked it, will you kindly send us a copy and rectify it.

Very carefully. It is a hard job these hot, sultry days to bend over a washboard or turn a washboard in the water unmixed by the hand. And it is by reason, eloquent of the fact that no brother of man is born of emotions that carry us and our moral outlook as high as the heavens themselves. I hope every man in the United States of America, in a spirit of enthusiasm, or in a democratic spirit, attempts to inflate our people and polarize the minds of our children against Britain; gets what he deserves."

Cox Is A Friend Of Great Britain

Nominees for U. S. Presidency Declares Against Inflaming Anti-British Feeling

While Cox was present at a patriotic rally held in Massey Hall, Toronto, under Empire Club auspices, on November 22, 1918, Hon. J. M. Cox, Governor of the state of Ohio, carried the audience with him when he declared that the man who is criminal and should undergo trial as a common murderer and assassin for violation of international laws, Mr. Cox impressed his hearers by his eloquence and friendliness. Cox and Britain spoke eloquently in defense of good relations between America and Canada.

"We are proud of the fact," he said, "that between us is the longest bound line in the world unbroken by the human hand. We are also, eloquent of the fact that no brother of man is born of emotions that carry us and our moral outlook as high as the heavens themselves. I hope every man in the United States of America, in a spirit of enthusiasm, or in a democratic spirit, attempts to inflate our people and polarize the minds of our children against Britain; gets what he deserves."

The Foolish Hun

Only One Thing Keenly German From Making Another Bid For World Power

A company of German troops in Berlin, who were sent to salute the flag at the French embassy just before the end of the war, were shaping the famous war song that was specially intended to express the idea that Germany is supreme over all.

The crowd in the streets would have been greatly surprised by the way had been sent to salute the flag in order to make official any end for the action of a mile or two days before in turning down the truce.

It is useless, of course, to expect that the German people could recover from the feelings which suffice the war and those which grew out of it, to last even two years. But it might be expected that the peace would play some larger part in restraining their expression of these feelings than it seems to be doing.

With the German minister at Spa working with the Allies on a triple front, the task of getting a German economic reconstruction, was hardly a fitting time for German soldiers and the Berlin public to throw insults at any other nation and state—less of all the state whose capital is farthest to the northeast, when conditions shall be imposed on Germany. If that is the German idea of how to equitably end fighting among their enemies, and to get concessions which are not demanded by the terms, and which they decline to honor even for the same day as ours.

The average acreage sown in a day with the same equipment is from 40 to 50 acres, according to the man manager. This is 23 years old and lives at Tresslbank, Hanover.

One pill a day, 25 cents a box, All Agents, Dr. Edmundson, Bates & Co., Ltd., Toronto.

Dr. Chase's Kidney Liver Pills

Why not get right after this trouble and end it by using Chase's Kidney-Liver Pills to restore the health and activity of the liver? Constitution, Indigestion, backache, rheumatism, biliousness seem to become chronic and recurs every two or three weeks, with severe sick headache.

When the condition of the liver is neglected, biliousness seems to become chronic and recurs every two or three weeks, with severe sick headache.

Many of our cures are but a momentary way of looking at our privileges.

Canada Imports Agricultural Products

Dominion Bureau of Statistics Shows Need of Co-Operation

Foreign farmers, i.e., those farming land outside Canada, found a profitable market here in the last twelve months for over 143,131 million dollars' worth of their products. Farmers and livestock breeders will find the story told plainly and interesting in the following abstracts from the return of the Dominion Bureau of Statistics. It gives the imports of live animals and of animal products into Canada for the last three years ending May 30th (1919 omitted) for 1918, 1919, and 1920, respectively.

Domestic living, \$2,517, \$2,419, \$2,412.

Lard, \$3,639, \$2,682.

Lettuce, \$6,640, \$10,593, \$18,059.

Live cattle, \$1,200,000, \$1,200,000, \$1,200,000.

Meat, \$343,715, \$40,340, \$74,210.

Meat, \$67,304, \$143,356.

Many of these imports are offset by our exports of the same class. Our Canadian manufacturers import live animals and meat from abroad and the Canadian farmers have to export the results of their work to be raw material in other countries. The needless "frictioning" of products and the expense of shipping them to market can be largely eliminated were Canadian farmers and Canadian farmers to be more closely linked together. Manufacturers might sell more what the Canadian farmer under the climatic conditions of Canada can produce, and the Canadian farmers might more definitely aim at selling that for which manufacturers can the best find a market.

A considerable part of the products given above could have been produced in the Dominion had it possibly manufactured for Canadian consumers if industry and farming had been more closely related during the last twenty years.—The Industrial and Development Council of Canadian Manufacturers, 186 King Street, W., Toronto.

Belgium's Recovery

Country's Exports May Exceed Imports Before End of Year

Belgium is making rapid recovery from German depredations committed during the war. At the close of the war 2000 kilometers of railroads, 1800 bridges, 600 kilometers of canals, telegraphs, and telephone systems and a third of the factories of the country had been destroyed. The reconstruction has been proceeding steadily since the minister, and Emile Francq, the Belgian minister of state, writing in the magazine of Wall Street, states that the railroads, telegraphs, and telephone lines have been completely repaired. The canals are navigable and many industries have been revived. Although coal production is a little higher than in 1913, reaching 105 percent of that year, the coal and coke production are gradually being restored to normal and plate glass works are in full operation. The progress has been slower in the steel construction industry.

Exports, he added to Holland, France, Italy and Germany surpass imports from these countries.

The balance with England is slowly but surely improving itself, and from this point of view the situation looks brighter—but before the end of the year Belgium will export more than she imports.

It is useless, of course, to expect that the German people could recover from the feelings which suffice the war and those which grew out of it, to last even two years. But it might be expected that the peace would play some larger part in restraining their expression of these feelings than it seems to be doing.

With the German minister at Spa working with the Allies on a triple front, the task of getting a German economic reconstruction, was hardly a fitting time for German soldiers and the Berlin public to throw insults at any other nation and state—less of all the state whose capital is farthest to the northeast, when conditions shall be imposed on Germany. If that is the German idea of how to equitably end fighting among their enemies, and to get concessions which are not demanded by the terms, and which they decline to honor even for the same day as ours.

The average acreage sown in a day with the same equipment is from 40 to 50 acres, according to the man manager. This is 23 years old and lives at Tresslbank, Hanover.

Girls for Canada

Continued from page 1

of 150 girls who served England in the Land Army, settling on fruit farms in Ontario and British Columbia; and of 25 trainee colonists skilled in horticulture, starting from the Marconi site destined for the mills of Toronto. Scarce a ship arrives at Canada ports but carries one or more parties of English girls among the ten great provinces.

The Dominion has done its part.

It must be remembered, too, that the war unutterably changed the life of the women of England, taking them out of their rats, as it were, and forcing them to take up new interests. At first on a few only of the purely male pursuits, they encroached little by little, as the necessity arose, until they were making and fitting ships, producing in very little time, held in high esteem. Women, who previously had led an active life, found themselves drawn in when the need became pressing, and served their country in ways which prior to 1914, would have been inconceivable.

Reversal to Old Times

The armistice found them thrown back with vastly differing ideas and tastes to what was apprehending's state. They had to learn again their positions; they liked the fire, and with a broadened prospect found the reversal to old times unbearable. What more natural then than that what was once familiar to Canada for a wider scope and fresh fields for their endeavours.

A large party of female emigrants to Canada since last fall has been returning to England from the various colonies. The women, Americans, W.A.C., W.R.A.F., W.R.N.S., transport and ambulance drivers, etc., who served the country nobly and selflessly throughout the stressful days of the war, are finding themselves in the animation and ever-changing vista of occupation, they too naturally, face the problem of their brothers in the service and find it difficult to resume regular civilian pursuits, post-war days. Their look with antipathy towards this country, and because of their claim on the Empire for services rendered, and because their brothers are still serving, makes it difficult for the various phases of the Dominion's work. The Federal Government is encouraging their emigration to this country, and because of their claim on the Empire for services rendered, and because their brothers are still serving, makes it difficult for the various phases of the Dominion's work.

Proceedings will be started under Section 152 of the Alberta Town Act if Noxious Weeds and Plants of this order are allowed to grow.

Govern yourselves accordingly.

F. H. LILLY,

Sec-Treas. Town of Strathmore.

MUNICIPAL DISTRICT OF JOHN
VALLEY, No. 219

NOTICE TO NOXIOUS WEEDS

By Order of the Mayor and Town Council.

Composing the destination of all Noxious Weeds and Plants of the order or species of the poems upon which the same may be grown or standing in default.

Proceedings will be started under Section 152 of the Alberta Town Act if Noxious Weeds and Plants of this order are allowed to grow.

Govern yourselves accordingly.

F. H. LILLY,

Sec-Treas. Town of Strathmore.

—S— left hip, WAS IMPOUNDED
ON AUGUST 22, 1929, AT THE VEN-
UE DESIGNATED ON THIS DAY
211, Tp. 21, R. 25, W.M. 4 on 5th
DALE AVENUE, STRATHMORE,
Alberta.

Dated at Carlsruhe this 13th day of
August 1929.

ALFRED ANDERSON

25-9

NOTICE TO NOXIOUS WEEDS

If any ratepayer of this Municipal District in danger of loss from the spreading of noxious weeds from infested lands (where the owner or occupant of the land has failed to make an effort to control them) will report the existence of, and danger to him, from the proximity of such noxious weeds to the Municipal Office, Strathmore, the destruction of same will be undertaken at the expense of the party responsible for their destination.

All reports sent in will be treated as confidential.
